

Score a segment pair against an SQR rubric.

Paste an English source and its Urdu translation. Meridian scores the pair across five localization quality dimensions and flags anything that needs a second look.

RUBRIC REFERENCE

Accuracy: Does the translation preserve the source meaning without addition, omission, or distortion?

Fluency: Does the target text read naturally, with correct grammar and idiomatic phrasing?

Terminology: Are domain-specific or recurring terms translated consistently and correctly?

Style / Register: Does the tone and formality match the source and the intended audience?

Locale Convention: Are dates, numbers, honorifics, and cultural references adapted correctly for the target locale?
